A blue-toned world map with glowing white lines connecting various global locations, symbolizing a global network. The map is centered on the Atlantic Ocean, with North and South America on the left and Europe and Africa on the right. The lines are curved and radiate from several points, creating a sense of dynamic connectivity.

Defence and Military Solution

Smart Glasses

Defence and Military Solution

Smart Glasses Description

Thermal Glass is a high-tech product specially developed for epidemic prevention. It integrates infrared thermal imaging technology, AI capability, AR technology, big data and other advanced technologies. Thermal Glass is the world's first safe and efficient non-contact temperature measurement equipment, with the focus of aiding mobile patrols in external environments. This product enhances the ability of mobile patrol officers to quickly and accurately measure human temperature in large and crowded areas with a high volume of traffic, including but not limited to hospitals, train stations, airports, parks, and tourist attractions. This product aims to help increase the efficiency and effectiveness of epidemic prevention personnel, and protect these individuals by reducing close physical contact with other people while conducting their duties. It is a high-tech intelligent terminal equipment that can meet the practical needs of body temperature screening and epidemic prevention and control.
