KEY FEATURES

Key Features

► Real-Time Connectivity

Data and video can be instantly uploaded through the network to a secure server.

► DMS

The driver monitoring systems is to alert the driver when signs of drowsiness or distraction (smoking, phone-call etc) are detected. Drivers receive an audio warning, while fleet managers receive an alert - which can include a photo capturing the incident.

► Driver's Behavior Analysis

Detects each driver's driving behavior by high precise G-sensor algorithm, such as harsh acceleration and braking, sharp turn, and over-speed.

► Video On-Demand

Automatic transmission of harsh events or collisions. Drivers can send footage at the press of panic button
