Facial Recognition System

We work with best Forward-Thinking technology partners to create safer and more secure planet through Face Recognition Technology.

How Face Recognition System Works?

The software is based on the ability to first recognize the face first, which is a technological feat in itself.

There are about 80 nodal points on a human face. Few of them are listed below:

- Distance between the eyes
- Width of the nose
- Depth of the eye socket
- Cheekbones
- Jawline and chin

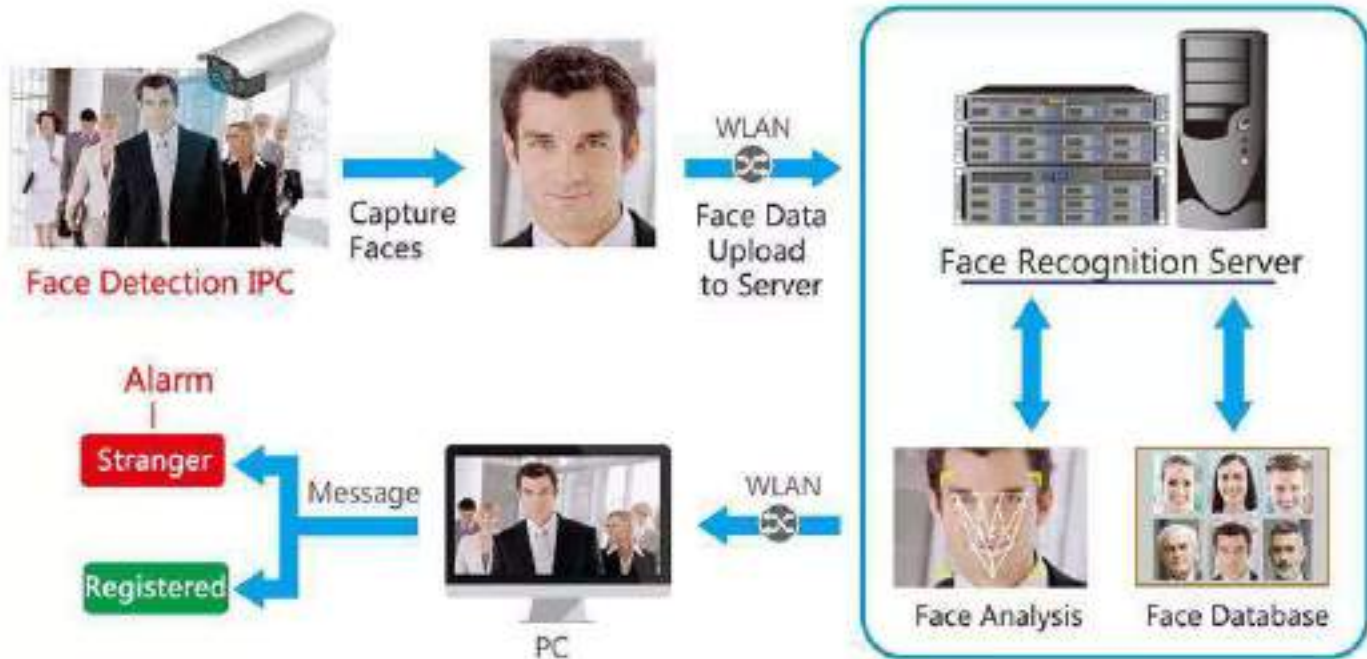

These nodal points are measured to create a numerical code, a string of numbers that represents a face in a database. This code is called face print.

Only 10 to 22 nodal points are needed for face it software to complete the recognition process.

Support VC Software List

www.aymeet.com

Video Conference Hardware

Full Range of HD video camera to meet different application

Specialist on USB video conference cameras & Audio Devices

Full range of video cameras & Audio devices to meet different applications.

Flexible system Capabilities Support

major VC software Brand

Wide Industry Application in telemedicine, corporate, education and banking.

Adapt to Cloud Collaboration Trend; Plug & Play Solution

AYMEET VC Benefits

Enterprise grade security

No installation/download

Intuitive UX

Large volume broadcast support

Low bandwidth conference support(Min 60kbps)

Continuous presence up to 40 streams

4K support

Room based meeting organiser

Multi-display support

API integration with any exiting platforms

Collaborative tools(Chat, File sharing, Screen/
Application/Tab sharing, whiteboard, etc)

Multi device/OS support

Cloud/On-premise deployment, etc

Ayrus Global have been working on IOT technology R&D and application, We also offer whole smart TMS solution and service to our clients .

Based on Beidou/GPS, GIS, Bluetooth , Internet, IOT, Big Data etc telematics . We pay specifically attention to the details and devote to automating the transportation and logistics operations . Our solution can realize Visualization, telematics, transparent management for our clients.

Bluetooth AP: A device connected to the Bluetooth network

According to the different needs of customers to achieve the following functions :

Built-in **temperature sensor** - used in cold chain transport (real-time monitoring of cold chain compartment temperature changes) ;

Built-in **infrared light sensor** - used in logistics and transportation security (with W103 smart electronic lock use, when the car door is unusually open, with infrared light function of the Bluetooth AP will immediately report to the platform to prevent the theft of goods during transport).

Vehicle Monitoring System

HD 1080P Body Worn Camera

Body Worn Camera

1080P, High Definition, Night Vision, 12H Battery

Product features:

1. Built in Ambarella A12 chip, Stable operation of the product, With high definition, low illumination industrial grade 1/3 CMOS photosensitive element, the image effect is outstanding, the color is gorgeous and true.
2. professional waterproof and dustproof design, IP67 waterproof level can effectively prevent rain and dust into.
3. Full HD 1080P 30fps camera, H.264 encoding, using Ambarella Smart ultra low bit stream design, reduce storage capacity.

Applications of Body Camera

Traffic Police

Patrol Police

Coastal Police

Insurance Police

Fire Fighting

Medical Treatment

Benefits of Body Worn Camera

ACT. BE SAFE

Wherever or when ever; your colleagues will be up-to-date on your situation.

All full HD recordings can assist you in analyzing the incidents that have occurred.

Health Care Industry

People Flow Control Solution

Real-time display numbers

Display inside person numbers and available enter person numbers

Automatic alarm when person too crowded

When available person numbers is 0, the system will automatic alarm

Real-time display video and counting people quantities

Directly to check real time video and easy to do config on SVM

Easy and rapid deployment

Rapid to install, easy to use, high security monitoring, suit for all scenes

People counting camera

- Super backlight human detect technology to meet use for all scenes
- Accuracy to update and display real-time person numbers
- Camera easy and rapid to deployment/hanging or wall install are available

Applications:
